

COVID-19 UPDATE: NEW POLICY FOR INBOUND TRAVELLERS (MEMBERS & GUESTS)

21 January 2022

Please be informed that commencing 22 January, 2022, **the Club will require all members and guests not to access the Club by counting back for the full 21 days from the day they return to Hong Kong from their trip, regardless of the quarantine period.**

Should you travel from a country group that requires 21 days quarantine, you are required not to access the Club for 21 days from your date of arrival in Hong Kong, if your travel period is 21 days or less. This policy will have no effect if your travel period is 22 days or more and extends to all those who live in the same household.

This 21-day policy will help avoid the risk of closure or testing notices imposed on the Club and thus minimise potential disruption to members and staff, as the Centre for Health Protection counts back 21 days from the date a traveller arrives in Hong Kong, should he/she test positive, when tracing his/her potential close contacts.

Examples:

HK Departure Date	HK Arrival Date	Travel Period	Last Club Access Date
1 February	14 February	14 days (< 21 days)	23 January
1 February	21 February	21 days	30 January
1 February	25 February	25 days (> 21 days)	Any time before departure

Note: The arrival day is excluded in the calculation.

The minimum 14 days of staying away from the Club applies to all members and guests travelling to areas that require less than 14 days quarantine (home or hotel) in the Return2HK Scheme and those exempted cases.

We thank you for your continued co-operation.
