## COVID-19 UPDATE

1 March, 2022

Dear Members,

With a rapid increase in Covid-19 cases in Hong Kong, I would like to give you a bit of perspective on how we are handling the current situation at the LRC in order to continuously ensuring that the club remains a safe haven and is managed in the least disruptive manner possible.

The latest tightening of social distancing measures by the government were published on February 23 and it is confirmed that the current closures of our sports and recreation facilities will be extended until March 9 and perhaps even as late as April 20, 2022. Whilst this was not unexpected, we are still hopeful to receive some positive news soon and to see you being able to use all club facilities again, in due course. Please refer to the [government link](#) on this matter.

However, the team is working hard, every single day, to keep any potential health risks to our LRC community to an absolute minimum. We have developed a Covid-19 Standard Operating Manual (SOP) that includes well over 100 pages of policies and procedures on how to handle any Covid-19 related situations and to ensure that all key team members are aligned with any questions or challenges we may encounter. It is therefore our utmost goal to ensure that the LRC is operated in the most responsible manner and remains a safe place for members, guests and all of our hardworking staff.

Whilst many members of the community are affected by this pandemic, the LRC is no exception. In the event of an infection at the club, we will continue to close down the affected area and follow protocol in terms of our deep-cleaning procedures. With this in place, we do not intend to advise you of every infection that occurs on club premises but please note the following:

1. All frontline staff members undergo a weekly self-rapid test.
2. All departments work in A & B Teams to ensure that the club will always remain operational in case of an infection.
3. Where possible, staff work from home.
4. Affected areas will close by compartments and are deep-cleaned overnight.

We thank you for your continuous support and understanding and look forward to seeing you at the Club.

Best regards and stay safe!
